## What is your picture of ideal care?

Whatever your thoughts 'it does exist' and it is called "Cornfield Care Centre".

Cornfield Care Centre nestles in 26 acres of landscaped grounds and is situated in a peaceful, tranquil setting with a mature tree line. This purpose-built, luxury facility embraces state of the art nursing equipment subtly combined with luxurious five star accommodation.

Cornfield Care Centre provides General Nursing care to the elderly and people who suffer from Dementia within five distinct areas, Kingfisher, Nightingale, Goldfinch, Castle Lane and Green Lane Suites.

We also provide a General and Dementia Day Care Service.

All bedrooms are single ensuite with most bedrooms having private access from their patio doors to the beautiful pond filled grounds, or an

internal courtyard where bubbling water and wind rustling trees can be enjoyed. All bedrooms have a direct line telephone and a television point capable of receiving satellite and terrestrial channels.

It is the aim of the care team to ensure that each resident receives an individual and personalised package of care, tailored to suit each resident's personal and particular need. A sister leads each team and a named nurse is allocated to each resident.

Our in-house catering team meet all the residents' dietary needs with nutritious fresh home baked fare being provided daily. The housekeeping team also ensures that the high standards and expectations of the residents remain paramount.

It is our desire to provide the highest possible care and would welcome enquiries, however we recommend that you telephone to make an appointment to discuss your individual care needs and view our excellent facilities.
